

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878  
Issue date: 31-1-2025 Version: 1.0

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

Product form : Mixture  
Product name : Fleetguard Engine Oil 20W-50 CI-4  
Product code : V400388004  
Product group : Trade product  
Other means of identification : Fleetguard Part No.  
CL4100700MA EEJ  
CL4100700JX EEP  
CL4100700JA EED

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

##### Relevant identified uses

Intended for general public  
Main use category : Industrial use, Professional use, Consumer use  
Use of the substance/mixture : Lubricant  
Function or use category : Lubricants and additives

#### 1.3. Details of the supplier of the safety data sheet

##### Supplier

Fleetguard  
Waterfall Commercial Park,  
Pretoria Main Road and Beatty Street,  
Woodmead, Johannesburg  
South Africa  
T +27 (0) 10 285 0200  
[fleetguard.support.emea@atmus.com](mailto:fleetguard.support.emea@atmus.com)

##### Other

Fleetguard  
Zone Industrielle du Grand Guelen  
29556 Quimper Cedex 9  
France  
T +33 (0) 2 9876 4949  
[fleetguard.support.emea@atmus.com](mailto:fleetguard.support.emea@atmus.com)

##### Other

Fleetguard  
3rd Floor 10 Eastbourne Terrace  
Paddington W2 6LG, London  
United Kingdom

##### Other

Fleetguard  
Catenbergstraat 1  
BE 2840 Rumst  
Belgium  
T +32 (0) 3 456 3000  
[fleetguard.support.emea@atmus.com](mailto:fleetguard.support.emea@atmus.com)

##### Other

Fleetguard  
Unit 3 / Valley Drive / Valley Park / Rugby  
CV21 1 TN Warwickshire  
United Kingdom  
T +44 (0) 1788 853600  
[fleetguard.support.emea@atmus.com](mailto:fleetguard.support.emea@atmus.com)

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

| Country/Area   | Organisation/Company      | Address | Emergency number | Comment          |
|----------------|---------------------------|---------|------------------|------------------|
| United Kingdom | NHS 111/NHS 24/NHS Direct |         | 111<br>0845 4647 | or call a doctor |

## SECTION 2: Hazards identification

### 2.1. Classification of the substance or mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP]

Not classified

#### Adverse physicochemical, human health and environmental effects

To our knowledge, this product does not present any particular risk, provided it is handled in accordance with good occupational hygiene and safety practice.

### 2.2. Label elements

#### Labelling according to Regulation (EC) No. 1272/2008 [CLP]

|                                |                                                                                                                                                                                                                                                          |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautionary statements (CLP) | : P102 - Keep out of reach of children.                                                                                                                                                                                                                  |
| EUH-statements                 | : EUH208 - Contains Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs, calcium salts, Alkyl (C18-C28) toluenesulfonic acid, calcium salts, borated. May produce an allergic reaction.<br>EUH210 - Safety data sheet available on request. |
| Child-resistant fastening      | : Not applicable                                                                                                                                                                                                                                         |
| Tactile warning                | : Not applicable                                                                                                                                                                                                                                         |

### 2.3. Other hazards

Contains no PBT and/or vPvB substances  $\geq 0.1\%$  assessed in accordance with REACH Annex XIII

The mixture does not contain substance(s) included in the list established in accordance with Article 59(1) of REACH for having endocrine disrupting properties, or substance(s) are not identified as having endocrine disrupting properties in accordance with the criteria set out in Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at a concentration equal to or greater than 0,1 %

## SECTION 3: Composition/information on ingredients

### 3.2. Mixtures

| Name                                                                                               | Product identifier                                                                                   | %         | Classification according to Regulation (EC) No. 1272/2008 [CLP] |

### Specific concentration limits:

| Name                                                                             | Product identifier                        | Specific concentration limits (%)                                    |
|----------------------------------------------------------------------------------|-------------------------------------------|----------------------------------------------------------------------|
| Alkyl (C18-C28) toluenesulfonic acid, calcium salts, borated                     | EC-No.: 953-650-0                         | (2 ≤ C < 100) Skin Sens. 1B; H317<br>(17,5 ≤ C < 100) Repr. 2; H361d |
| Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts | CAS-No.: 722503-68-6<br>EC-No.: 682-816-2 | (2 ≤ C < 100) Skin Sens. 1B; H317                                    |

Note L: The harmonised classification as a carcinogen applies unless it can be shown that the substance contains less than 3 % of dimethyl sulphoxide extract as measured by IP 346 ("Determination of polycyclic aromatics in unused lubricating base oils and asphaltene free petroleum fractions – Dimethyl sulphoxide extraction refractive index method" Institute of Petroleum, London), in which case a classification in accordance with Title II of this Regulation shall be performed also for that hazard class.

Full text of H- and EUH-statements: see section 16

## SECTION 4: First aid measures

### 4.1. Description of first aid measures

|                                       |                                                                  |
|---------------------------------------|------------------------------------------------------------------|
| First-aid measures general            | : If you feel unwell, seek medical advice.                       |
| First-aid measures after inhalation   | : Remove person to fresh air and keep comfortable for breathing. |
| First-aid measures after skin contact | : Wash skin with plenty of water.                                |
| First-aid measures after eye contact  | : Rinse eyes with water as a precaution.                         |
| First-aid measures after ingestion    | : Call a poison center or a doctor if you feel unwell.           |

### 4.2. Most important symptoms and effects, both acute and delayed

|                                                  |                                                                                                                                                                                                                                                        |
|--------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Symptoms/effects after inhalation                | : At normal ambient temperatures this product will be unlikely to present an inhalation hazard because of its low volatility. May be harmful by inhalation if exposure to vapour, mists or fumes resulting from thermal decomposition products occurs. |
| Symptoms/effects after skin contact              | : Unlikely to cause harm to the skin on brief or occasional contact but prolonged or repeated exposure may lead to dermatitis. High pressure injection of product into the skin may lead to local necrosis if the product is not surgically removed.   |
| Symptoms/effects after eye contact               | : Unlikely to cause more than transient stinging or redness if accidental eye contact occurs.                                                                                                                                                          |
| Symptoms/effects after ingestion                 | : Bad taste. Unlikely to cause harm if accidentally swallowed in small doses, though larger quantities may cause nausea and diarrhoea.                                                                                                                 |
| Symptoms/effects upon intravenous administration | : Unknown.                                                                                                                                                                                                                                             |

### 4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically.

## SECTION 5: Firefighting measures

### 5.1. Extinguishing media

|                                |                                                                                  |
|--------------------------------|----------------------------------------------------------------------------------|
| Suitable extinguishing media   | : Water spray. Dry powder. Foam. Carbon dioxide.                                 |
| Unsuitable extinguishing media | : Do not use a heavy water stream. Use of heavy stream of water may spread fire. |

### 5.2. Special hazards arising from the substance or mixture

|             |                                                                                              |
|-------------|----------------------------------------------------------------------------------------------|
| Fire hazard | : Combustion generates: CO, CO <sub>2</sub> , POx, NOx, SOx, H <sub>2</sub> S. Metal oxides. |
|-------------|----------------------------------------------------------------------------------------------|

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

|                                                  |                                                                              |
|--------------------------------------------------|------------------------------------------------------------------------------|
| Explosion hazard                                 | : Not expected to be a fire/explosion hazard under normal conditions of use. |
| Hazardous decomposition products in case of fire | : Toxic fumes may be released.                                               |

### 5.3. Advice for firefighters

|                                |                                                                                                                                                                             |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautionary measures fire    | : Do not enter fire area without proper protective equipment, including respiratory protection.                                                                             |
| Firefighting instructions      | : Fight fire from safe distance and protected location. Do not enter fire area without proper protective equipment, including respiratory protection.                       |
| Protection during firefighting | : Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.                                    |
| Other information              | : Prevent fire fighting water from entering the environment. Sweep up and remove to a suitable, clearly marked container for disposal in accordance with local regulations. |

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

|                                    |                                                                                                                                                                                                                                    |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| General measures                   | : Stop leak if safe to do so. Notify authorities if product enters sewers or public waters.<br>Absorb spillage to prevent material damage.                                                                                         |
| <b>For non-emergency personnel</b> |                                                                                                                                                                                                                                    |
| Protective equipment               | : When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required. Use protective clothing. |
| Emergency procedures               | : Ventilate spillage area.                                                                                                                                                                                                         |
| <b>For emergency responders</b>    |                                                                                                                                                                                                                                    |
| Protective equipment               | : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".                                                                        |
| Emergency procedures               | : Evacuate unnecessary personnel. Stop leak if safe to do so.                                                                                                                                                                      |

### 6.2. Environmental precautions

Avoid release to the environment.

### 6.3. Methods and material for containment and cleaning up

|                         |                                                                                                                                                                                       |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For containment         | : Absorb spilled material with sand or earth. Contain any spills with dikes or absorbents to prevent migration and entry into sewers or streams. Stop leak without risks if possible. |
| Methods for cleaning up | : Take up liquid spill into absorbent material.                                                                                                                                       |
| Other information       | : Dispose of materials or solid residues at an authorized site.                                                                                                                       |

### 6.4. Reference to other sections

For further information refer to section 13.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

|                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Additional hazards when processed | : Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. |
| Precautions for safe handling     | : Ensure good ventilation of the work station. Wear personal protective equipment.                                                                                                                                                                                                                                                                                                                                                              |
| Hygiene measures                  | : Do no eat, drink or smoke when using this product. Always wash hands after handling the product.                                                                                                                                                                                                                                                                                                                                              |

### 7.2. Conditions for safe storage, including any incompatibilities

|                       |                                                               |
|-----------------------|---------------------------------------------------------------|
| Technical measures    | : Keep container tightly closed and in well ventilated place. |
| Storage conditions    | : Keep cool. Protect from sunlight.                           |
| Incompatible products | : Reacts vigorously with strong oxidizers and acids.          |

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

|                              |                                                                             |
|------------------------------|-----------------------------------------------------------------------------|
| Maximum storage period       | : 5 year                                                                    |
| Storage temperature          | : ≤ 40 °C                                                                   |
| Information on mixed storage | : Keep away from : Oxidizing materials. Strong acids.                       |
| Storage area                 | : Store at ambient temperature.                                             |
| Special rules on packaging   | : Keep container tightly closed and dry.                                    |
| Packaging materials          | : Store always product in container of same material as original container. |

### 7.3. Specific end use(s)

No additional information available

## SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

#### National occupational exposure and biological limit values

| Highly refined mineral oil (C15 -C50)              |                      |
|----------------------------------------------------|----------------------|
| EU - Indicative Occupational Exposure Limit (IOEL) |                      |
| IOELV TWA (mg/m <sup>3</sup> )                     | 5 mg/m <sup>3</sup>  |
| Highly refined base oil (64741-88-4)               |                      |
| EU - Indicative Occupational Exposure Limit (IOEL) |                      |
| IOELV TWA (mg/m <sup>3</sup> )                     | 5 mg/m <sup>3</sup>  |
| IOELV STEL (mg/m <sup>3</sup> )                    | 10 mg/m <sup>3</sup> |

#### DNEL and PNEC

Exposure-value for oil mist : 10 mg/m<sup>3</sup> (15 min.) or 5 mg/m<sup>3</sup> (8 hours).

### 8.2. Exposure controls

#### Appropriate engineering controls

##### Appropriate engineering controls:

Ensure good ventilation of the work station.

#### Personal protection equipment

##### Personal protective equipment:

Gloves. In case of splash hazard: safety glasses. Eye protection should only be necessary where liquid could be splashed or sprayed.

##### Personal protective equipment symbol(s):

#### Eye and face protection

##### Eye protection:

Safety glasses

#### Skin protection

##### Skin and body protection:

Wear suitable protective clothing

##### Hand protection:

Protective gloves

##### Other skin protection

##### Materials for protective clothing:

PVC gloves. Neoprene or nitrile rubber gloves

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

### Respiratory protection

#### Respiratory protection:

In case of insufficient ventilation, wear suitable respiratory equipment.

### Environmental exposure controls

#### Environmental exposure controls:

Avoid release to the environment.

#### Consumer exposure controls:

PVC gloves. Neoprene or nitrile rubber gloves.

#### Other information:

Do not put the product-soaked rags into the pockets of working clothes. Do not use cloths stained with the product to dry hands. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Do not eat, drink or smoke during use. Wash contaminated clothing before reuse.

## SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

|                                 |                                                     |
|---------------------------------|-----------------------------------------------------|
| Physical state                  | : Liquid                                            |
| Colour                          | : brown.                                            |
| Appearance                      | : Oily. Liquid.                                     |
| Odour                           | : characteristic.                                   |
| Odour threshold                 | : Not available                                     |
| Melting point                   | : -33 °C ASTM D 97                                  |
| Freezing point                  | : Not available                                     |
| Boiling point                   | : > 280 °C                                          |
| Flammability (solid, gas)       | : Non flammable.                                    |
| Lower explosive limit (LEL)     | : 0,6 vol %                                         |
| Upper explosive limit (UEL)     | : 7 vol %                                           |
| Flash point                     | : 246 °C ASTM D 92                                  |
| Auto-ignition temperature       | : > 240 °C                                          |
| Decomposition temperature       | : Not available                                     |
| pH                              | : Not available                                     |
| Viscosity, kinematic            | : 100 – 180 mm <sup>2</sup> /s at 40 °C, ASTM D 445 |
| Solubility                      | : insoluble in water.                               |
| Log Kow                         | : Not available                                     |
| Vapour Pressure 20°C            | : < 0,1 hPa                                         |
| Vapour pressure at 50°C         | : Not available                                     |
| Density                         | : 0,87 – 0,88 kg/l ASTM D 4052                      |
| Relative density                | : Not available                                     |
| Relative vapour density at 20°C | : > 1 (air=1)                                       |
| Particle characteristics        | : Not applicable                                    |

### 9.2. Other information

#### Information with regard to physical hazard classes

|                  |                 |
|------------------|-----------------|
| Explosion limits | : 0,6 – 7 vol % |
|------------------|-----------------|

#### Other safety characteristics

|                                            |                                       |
|--------------------------------------------|---------------------------------------|
| Relative evaporation rate (butylacetate=1) | : < 0,1                               |
| VOC content                                | : 0 %                                 |
| Other properties                           | : Gas/vapour heavier than air at 20°C |

## SECTION 10: Stability and reactivity

### 10.1. Reactivity

Stable under normal conditions of use.

### 10.2. Chemical stability

Stable under normal conditions.

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

### 10.3. Possibility of hazardous reactions

Refer to section 10.1 on Reactivity.

### 10.4. Conditions to avoid

Moisture. Overheating.

### 10.5. Incompatible materials

Strong oxidizing agents. Strong acids.

### 10.6. Hazardous decomposition products

CO, CO<sub>2</sub>, PO<sub>x</sub>, NO<sub>x</sub>, SO<sub>x</sub>, H<sub>2</sub>S. Metallic oxides.

## SECTION 11: Toxicological information

### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity (oral) : Not classified (Based on available data, the classification criteria are not met)  
Acute toxicity (dermal) : Not classified (Based on available data, the classification criteria are not met)  
Acute toxicity (inhalation) : Not classified (Based on available data, the classification criteria are not met)

#### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|                    |                                                                                               |
|--------------------|-----------------------------------------------------------------------------------------------|
| LD50 dermal rabbit | > 5000 mg/kg bodyweight Animal: rabbit, Guideline: OECD Guideline 402 (Acute Dermal Toxicity) |
|--------------------|-----------------------------------------------------------------------------------------------|

#### Distillates (petroleum), hydrotreated heavy paraffinic (64742-54-7)

|                       |              |
|-----------------------|--------------|
| LD50 oral rat         | > 5000 mg/kg |
| LD50 dermal rat       | > 2000 mg/kg |
| LC50 Inhalation - Rat | > 5,53 mg/l  |

#### Highly refined base oil (64741-88-4)

|                       |                          |
|-----------------------|--------------------------|
| LD50 oral rat         | > 5000 mg/kg             |
| LD50 dermal rabbit    | > 5000 mg/kg             |
| LC50 Inhalation - Rat | > 5000 mg/m <sup>3</sup> |

Skin corrosion/irritation : Not classified

#### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|    |                                                                               |
|----|-------------------------------------------------------------------------------|
| pH | ≈ 7 Temp.: 25 °C Concentration: (≈)0,00116 other: Remarks on result: 'other:' |
|----|-------------------------------------------------------------------------------|

Serious eye damage/irritation : Not classified.

#### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|    |                                                                               |

Aspiration hazard : Not classified

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

### Fleetguard Engine Oil 20W-50 CI-4

|                      |                                                   |
|----------------------|---------------------------------------------------|
| Viscosity, kinematic | 100 – 180 mm <sup>2</sup> /s at 40 °C, ASTM D 445 |
|----------------------|---------------------------------------------------|

### 11.2. Information on other hazards

#### Other information

|                   |                                                                                                                                                                                                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Other information | : Toxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the toxicology of similar products, Likely route of exposure: ingestion, skin and eye. |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## SECTION 12: Ecological information

### 12.1. Toxicity

|                                                           |                                                                                                                         |
|-----------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Ecology - general                                         | : The product is not considered harmful to aquatic organisms nor to cause long-term adverse effects in the environment. |
| Ecology - water                                           | : This product floats on water and may affect the oxygen-balance in the water.                                          |
| Hazardous to the aquatic environment, short-term (acute)  | : Not classified                                                                                                        |
| Hazardous to the aquatic environment, long-term (chronic) | : Not classified                                                                                                        |

#### Highly refined mineral oil (C15 -C50)

|                                |          |
|--------------------------------|----------|
| EC50 other aquatic organisms 1 | 1,2 mg/l |
|--------------------------------|----------|

#### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|                                |                                                         |
|--------------------------------|---------------------------------------------------------|
| LC50 fish 1                    | 46 mg/l Test organisms (species): Cyprinodon variegatus |
| EC50 other aquatic organisms 1 | 1,2 mg/l invertebrates                                  |

#### Distillates (petroleum), hydrotreated heavy paraffinic (64742-54-7)

|                      |            |
|----------------------|------------|
| LC50 fish 1          | > 100 mg/l |
| EC50 Daphnia 1       | 10000 mg/l |
| EC50 72h - Algae [1] | > 100 mg/l |

#### Highly refined base oil (64741-88-4)

|                      |                                              |
|----------------------|----------------------------------------------|
| LC50 fish 1          | > 100 mg/l Pimephales promelas               |
| EC50 Daphnia 1       | > 10000 mg/l EC50 48h - Daphnia magna [mg/l] |
| EC50 72h - Algae [1] | > 100 mg/l Pseudokirchneriella subcapitata   |

### 12.2. Persistence and degradability

#### Fleetguard Engine Oil 20W-50 CI-4

|                               |                            |
|-------------------------------|----------------------------|
| Persistence and degradability | Not readily biodegradable. |
|-------------------------------|----------------------------|

#### Highly refined mineral oil (C15 -C50)

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
|-------------------------------|--------------------|

#### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
| Biodegradation                | < 5 %              |

#### Benzenesulfonic acid, methyl-, mono-C20-24-branched alkyl derivs., calcium salts (722503-68-6)

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
|-------------------------------|--------------------|

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

### Distillates (petroleum), hydrotreated heavy paraffinic (64742-54-7)

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
|-------------------------------|--------------------|

### Highly refined base oil (64741-88-4)

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
|-------------------------------|--------------------|

### Alkyl (C18-C28) toluenesulfonic acid, calcium salts, borated

|                               |                    |
|-------------------------------|--------------------|
| Persistence and degradability | Rapidly degradable |
|-------------------------------|--------------------|

## 12.3. Bioaccumulative potential

### Fleetguard Engine Oil 20W-50 CI-4

|                           |                                                                                       |
|---------------------------|---------------------------------------------------------------------------------------|
| Bioaccumulative potential | This product is not expected to bioaccumulate through food chains in the environment. |
|---------------------------|---------------------------------------------------------------------------------------|

### Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts (68784-31-6)

|         |   |
|---------|---|
| Log Pow | 4 |
|---------|---|

## 12.4. Mobility in soil

### Fleetguard Engine Oil 20W-50 CI-4

|                |                                                                                                                                                                            |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ecology - soil | Not miscible with water. Spillages may penetrate the soil causing ground water contamination. This product floats on water and may affect the oxygen-balance in the water. |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 12.5. Results of PBT and vPvB assessment

No additional information available

## 12.6. Endocrine disrupting properties

No additional information available

## 12.7. Other adverse effects

No additional information available

## SECTION 13: Disposal considerations

### 13.1. Waste treatment methods

|                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|--------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Regional waste regulation                  | : Disposal must be done according to official regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Product/Packaging disposal recommendations | : Dispose of contents/container in accordance with licensed collector's sorting instructions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Sewage disposal recommendations            | : Disposal must be done according to official regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Waste disposal recommendations             | : Disposal must be done according to official regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Additional information                     | : Do not re-use empty containers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Ecology - waste materials                  | : Every mixture with foreign substances such as solvents, brake- and cooling liquids is forbidden. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly. When not empty dispose of this container at hazardous or special waste collection point. |
| European List of Waste (LoW, EC 2000/532)  | : 13 02 05* - mineral-based non-chlorinated engine, gear and lubricating oils                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## SECTION 14: Transport information

In accordance with ADR / IMDG / IATA / ADN

# Fleetguard Engine Oil 20W-50 CI-4

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

### 14.6. Special precautions for user

#### Overland transport

Not regulated

#### Transport by sea

Not regulated

#### Air transport

Not regulated

#### Inland waterway transport

Not regulated

### 14.7. Maritime transport in bulk according to IMO instruments

Not applicable

## SECTION 15: Regulatory information

### 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

#### EU-Regulations

#### REACH Annex XVII (Restriction List)

## Safety Data Sheet

according to the REACH Regulation (EC) 1907/2006 amended by Regulation (EU) 2020/878

| EU restriction list (REACH Annex XVII) |                                                                                        |                                                                                                                                                                           |
|----------------------------------------|----------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reference code                         | Applicable on                                                                          | Entry title or description                                                                                                                                                |
| 3(c)                                   | Phosphorodithioic acid, mixed O,O-bis(sec-Bu and 1,3-dimethylbutyl) esters, zinc salts | Substances or mixtures fulfilling the criteria for any of the following hazard classes or categories set out in Annex I to Regulation (EC) No 1272/2008: Hazard class 4.1 |

### REACH Annex XIV (Authorisation List)

Contains no substance(s) listed on REACH Annex XIV (Authorisation List)

### REACH Candidate List (SVHC)

Contains no substance(s) listed on the REACH Candidate List

### PIC Regulation (Prior Informed Consent)

Contains no substance(s) listed on the PIC list (Regulation EU 649/2012 concerning the export and import of hazardous chemicals)

### POP Regulation (Persistent Organic Pollutants)

Contains no substance(s) listed on the POP list (Regulation EU 2019/1021 on persistent organic pollutants)

### Ozone Regulation (1005/2009)

Contains no substance(s) listed on the Ozone Depletion list (Regulation EU 1005/2009 on substances that deplete the ozone layer)

### Council Regulation (EC) for the control of dual-use items

Contains no substance subject to the COUNCIL REGULATION (EC) for the control of dual-use items

### VOC Directive (2004/42)

VOC content : 0 %

### Explosives Precursors Regulation (2019/1148)

Contains no substance(s) listed on the Explosives Precursors list (Regulation EU 2019/1148 on the marketing and use of explosives precursors)

### Drug Precursors Regulation (273/2004)

Contains no substance(s) listed on the Drug Precursors list (Regulation EC 273/2004 on the manufacture and the placing on market of certain substances used in the illicit manufacture of narcotic drugs and psychotropic substances)

## 15.2. Chemical safety assessment

A chemical safety assessment has been carried out
